

Clement

INSET ELECTRIC FIRE

CMT20BL

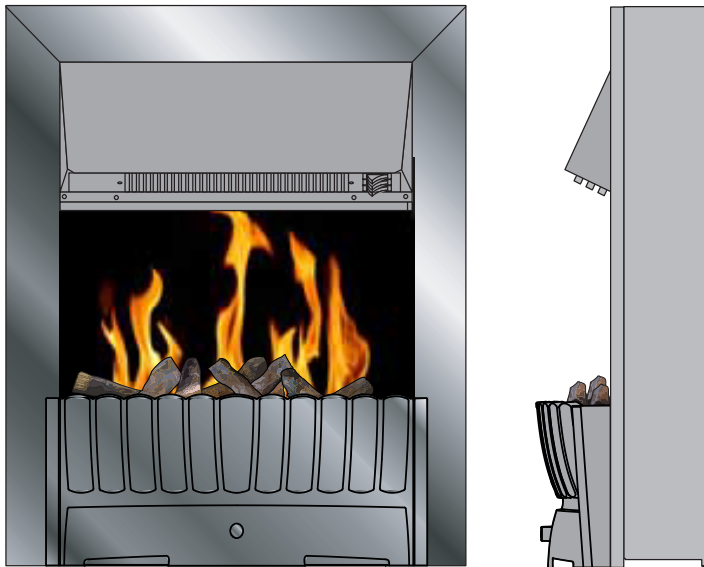

The Clement electric inset fire combines a classic black finish, realistic log fuel bed, Optiflame technology and a powerful 2kW electric fan heater with a choice of two heat settings. Not only are the visuals independent of the heater, meaning you can use them all year round for a cosy atmosphere, but they're run on LED bulbs for a low running cost and you have full control of the level of heat you require thanks to the thermostat.

The Clement is designed to fit standard fireplace openings and also includes a spacer kit which can transform the fire from inset to freestanding, meaning it can sit flat to any wall or fireplace. Easy to use and impressive to view; the Clement is a complete and reliable electric inset.
